

Program to write a function to add two numbers

Code:

```
def add_no (x,y):  
    print(x+y)  
x=int(input("Enter number 1: "))  
y=int(input("Enter number 2: "))  
add_no(x,y)
```

Output:

```
Enter number 1; 10  
Enter number 2: 20  
30
```
